DETAILED ACTION

A request for continued examination under 37 CFR 1.114 was filed in this application after appeal to the Board of Patent Appeals and Interferences, but prior to a decision on the appeal. Since this application is eligible for continued examination under 37 CFR 1.114 and the fee set forth in 37 CFR 1.17(e) has been timely paid, the appeal has been withdrawn pursuant to 37 CFR 1.114 and prosecution in this application has been reopened pursuant to 37 CFR 1.114. Applicant's submission filed on 2/6/03 has been entered.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 21 is rejected under 35 U.S.C. 103(a) as being unpatentable over Gray.

Note the last species in column 8, all but the first in column 9, last two in column 11, first in column 13, , second and third in column 17, first two in column 19, and last in column 21. These differ from q = 1 of the claims only in that they have a different substituent, e.g. halo or methoxy. However, column 8, lines 5-7 teaches the equivalency of these substituents. The sentence states that these substituents are alternatively useable for the invention, and hence the use of the COOH in place of e.g. halo would be obvious. Further, carboxy is known as a substituent, as is seen in the species of claims 1, 2, and 3. Hence, one would be motivated to use that substituent in particular.

Art Unit: 1624

In addition, the $q=2$ is also obvious, in view of the species of claims 1, 2, and 3. These differ only in that these have one COOH, and one other substituent, whereas the claim requires both be COOH. However, the same equivalence issues applies here. The reference teaches the two as equivalence.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1, 2, 4, 18, 19, 20, 21, 23, 24 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Point 4 of the Final Rejection remains. The definition of hydrocarbon, which for some claims has been added, and for others, appears in the specification, includes heteroatoms. Since the sole characteristic of a hydrocarbon is that it does not have heteroatoms, this violates the normal meaning of the term, as set forth in the references previously provided.

Claim 20 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 20 defines the variables R4 and R5, but these do not actually appear in the claim.

Art Unit: 1624

Claim Objections

Claims 5-7, 9-11 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
